## Application Information

**Flexible:** economical, fabric-backed foam for sanding a variety of materials; coated one side.

**Profile:** for corners and flat surfaces on wood, metal, plastic and paint; coated on three sides

**Small Area General Purpose:** for a wide variety of materials and sanding applications where flexibility is needed; coated four sides.

**Contour Single-sided:** thin, flexible; for sanding small diameters and contours such as ceramics, spindles, turnings and railings; coated one side.

**SoftTouch Contour:** superior flexibility; for hand-sanding or finishing flat, curved, contoured and hard-to-reach areas on wood, metal, composites, paint and solid surfaces; can be used wet or dry; washable; coated one side.

**Sealer Sanding:** very flexible; silicon carbide abrasive for sanding primers, sealers and between coats on furniture and cabinets; coated two sides.

# SOFTTOUCH CONTOUR SPONGES

## Norton SoftTouch Contour Sponges Designed with Superior Flexibility for Hand Sanding and Finishing.

SoftTouch contour sanding medium, fine and super fine sponges are coated on one side with high performance aluminum oxide and ultra fine and micro fine SoftTouch sponges are made with silicon carbide abrasives. They can be used on a variety of materials – wood, metal, fiberglass, composites, and plastic as well as on primer, stained, sealed or painted surfaces. They are washable and can be used wet or dry.

Norton SoftTouch contour sponges are designed to give needed flexibility for hand sanding and finishing. Their conformability allows you to generate a superior finish in hard to reach areas and corners on wood and metal furniture and detailed cabinets, composites and solid surfaces.
